

JFrame

ActionListener

es.deusto.client.Client

```
graph BT; Client[es.deusto.client.Client] --> JFrame[JFrame]; Client --> ActionListener[ActionListener];
```

The diagram illustrates a class hierarchy where the `es.deusto.client.Client` class inherits from both the `JFrame` class and the `ActionListener` interface. The `JFrame` and `ActionListener` boxes are positioned at the top, while the `es.deusto.client.Client` box is at the bottom. A horizontal line connects the two top boxes, and a vertical line descends from its center to the top of the bottom box. From this point, two arrows branch out, one pointing to the bottom of the `JFrame` box and the other pointing to the bottom of the `ActionListener` box, indicating the inheritance relationship.
